COMMENTARY

Global equities continued to rally in May, with emerging markets outperforming their developed market peers. Globally, technology stocks led gains, particularly companies exposed to artificial intelligence-related themes, resulting in strong market performance in both the US, with the S&P500 closing the month at an all-time high, as well as key emerging markets such as Taiwan and South Korea. In contrast, energy was among the weakest-performing sectors and experienced heightened volatility amid ongoing geopolitical uncertainty in the Middle East and fluctuating oil price expectations.

The Mobius Emerging Markets Fund's (MEMF) net asset value (NAV) returned 6.0% (Private C USD Founder and Private C EUR Founder), while the MSCI EM Mid Cap (Net TR) Index returned 4.1% in USD terms. The largest contributors to May performance were Taiwanese e-paper company E Ink (+2.2%), Korean holding company SK Square (+1.5%), and Taiwanese server rail kit provider King Slide Works (+1.4%). The largest detractors from performance were Korean medical aesthetics device manufacturer Classys (-1.2%), Indian retail investment platform Groww (-0.4%), and Taiwanese chip security IP provider eMemory (-0.4%).

MCP recently hosted a webinar providing an update on the Mobius Emerging Market Fund (MEMF), covering strategy, performance and portfolio developments. A recording of the webinar is available on our website at www.mcp-em.com.

This is a marketing communication. Please refer to the prospectus and to the KID which are available on the manager's website www.mcp-em.com/en/funds before making any final investment decisions.

Investor Profile

The Mobius Emerging Markets Fund has no required minimum holding period and is designed for long-term investment (at least five years). It is intended for both institutional and retail investors. As the Fund invests in equities it may therefore be subject to volatility. This requires an elevated risk tolerance and capacity.

Investment Strategy

The Fund's objective is to deliver long term absolute returns by investing in emerging and frontier market equities. The Fund aims to identify companies with resilient business models which are undervalued and mispriced. The Fund does not use any benchmark and follows an active investment style by partnering with portfolio companies to unlock value. This is achieved by engaging with stakeholders to improve corporate governance, set out a broader ESG pathway and act as a catalyst for wider operational and financial improvements. In connection with any performance fee, the sub-fund shall be guided by the MSCI EM Mid Cap Index. The sub-fund's investment universe is not limited to the index components.

Opportunities

- + Focus on dynamic small and mid-sized companies in many of the fastest growing economies in the world.
- + Fundamental bottom-up research process identifies resilient business models which are undervalued and mispriced.
- + Lower ESG standards in emerging and frontier markets offer a unique opportunity for active engagement approach.
- + Create value by delivering a clear ESG pathway for our portfolio companies.
- + Concentrated portfolio allows a customised engagement strategy for each company.

Risks

- The Fund pursues a very active management style. Its performance may therefore deviate considerably from that of a comparable market return.
- Pronounced fluctuations in price are characteristic of emerging and frontier economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges.
- Investments via Shanghai or Shenzhen Stock Connect are subject to additional risks, in particular quota limitations, custody risk, clearing/settlement risk and counterparty risk.
- Focusing intentionally on stocks in small and medium cap companies may entail additional risks (e.g. lower liquidity).
- In general, any investment carries the risk of loss of principal.

The Fund is subject to various other risks. Comprehensive information regarding risks can be found in the current sales prospectus which is available on the manager's website at www.mcp-em.com/en/funds

SUMMARY RISK INDICATOR

The historical data used for calculating the synthetic indicator are not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.

Technical Terms

Maximum drawdown: The maximum drawdown ratio indicates the maximum loss that an investor could have suffered within an observation period. It thus represents the maximum cumulative loss within a period under consideration.

Sharpe ratio: The Sharpe ratio is the difference between the performance achieved p.a. and the risk-free interest p.a., divided by volatility. It can therefore be interpreted as "risk premium per unit of total risk taken". In principle, the higher it is, the better it is (high return with low risk). Because of their nature as a relative variable, Sharpe ratios of different portfolios can be compared with each other as well as with that of the reference index.

Volatility: The volatility ratio is a measure of risk and shows the intensity of fluctuation of a price within a certain period of time. The higher the volatility, the more the price swings up and down and the riskier such an investment is.

ESG ENVIRONMENTAL / SOCIAL / GOVERNANCE

The fund invests in companies that have the potential to improve environmental factors, social factors and corporate governance (ESG) factors. The fund management actively supports the companies in driving these improvements. Furthermore, the fund uses exclusion criteria for investments (excluded sectors include tobacco, fossil fuels and gambling). Investments in these industries are not compatible with MCP's sustainable investment strategy. The Fund is a product as defined in Art.8 of the EU Sustainable Finance Disclosure Regulation (SFDR).

Disclaimer: This document is for marketing purposes. Please read the current sales prospectus and the KID before entering in any transaction. The only basis for the purchase of a fund are the Key Information Document (KID), the current Sales Prospectus with the Management Regulations or the articles of incorporation, the most recently published and audited Annual Report and the most recently published unaudited Semi-Annual Report, which can be obtained free of charge from IPConcept (Luxembourg) S.A. (société anonyme), 4, rue Thomas Edison L-1445, Strassen, Luxembourg (see also https://www.ipconcept.com/ipc/en/funds_overview.html). Risks can be found in the Sales Prospectus. The Sales Prospectus and the KIDs must be made available to the investor prior to purchase. The tax treatment depends on the individual circumstances of each investor. This marketing communication is for information purposes only and does not constitute an offer to buy or sell fund units. In particular, the recipient is advised to check the information with regard to its compatibility with his or her own personal circumstances, legal, regulatory, tax and other consequences, if necessary with the assistance of an advisor. Please refer to the current sales prospectus for information on opportunities and risks. No assurance can be given that the investment objectives will be achieved. This promotional communication is addressed exclusively to interested parties in the countries in which the aforementioned funds are authorised for public distribution. The Fund was established under Luxembourg law and is authorised for distribution in Luxembourg, Germany, Austria, Spain and Switzerland. The Fund may not be publicly offered for sale in the United States of America ("USA") or for the benefit of US persons.

The Management Company may decide to discontinue the arrangements it has made for the distribution of the units of its collective investment undertakings in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU. Further information on investor rights in German language can be found on the Management Company's website (www.ipconcept.com). <https://www.ipconcept.com/ipc/en/investor-information.html> The documents can also be obtained from the institution, ERSTE BANK DER OESTERREICHISCHEN SPARKASSEN AG, Am Belvedere 1, A-1100 Vienna.

For investors in Switzerland: The representative is IPConcept (Schweiz) AG, Bellerivestrasse 36, CH-8008 Zürich and the paying agent is DZ PRIVATBANK (Schweiz) AG, Bellerivestrasse 36, CH-8008 Zürich. The Prospectus, the Key Investor Information Document and the Annual and Semi-Annual Reports may be obtained free of charge from the Representative in Switzerland.

Past performance, simulations or forecasts are no reliable indicator of future performance. The gross performance according to the BVI method does not take into account the costs charged on the issue and redemption of units (issue and redemption premium) and fees incurred during the holding period (e.g. transaction costs). The investor may incur securities account costs and other costs (e.g. custody or safekeeping costs), which reduce the performance. It should be noted that the value of the acquired units may fluctuate due to fluctuations in the investments in the fund and the listing of the securities. The fund exhibits increased volatility due to the composition of its portfolio or the portfolio management techniques used, i.e. the unit price may be subject to considerable upward and downward fluctuations even within short periods of time. Furthermore, in the case of foreign currencies, the return may rise or fall as a result of currency fluctuations. MCP Emerging Markets LLP is authorised and regulated by the Financial Conduct Authority in the United Kingdom (FRN:791830).
